Education

SRM University

Aug 2023 – May 2027

Bachelor of Technology in Computer Science Engineering with specialization in AIML

Chennai, India

GPA: 9.2 / 10

Space Central School

Apr 2011 – May 2023

MPCC (Mathematics, Physics, Chemistry, Computer Science)

Sriharikota, India

GPA:7.5

Relevant Coursework

- Data Structures
- Algorithms Analysis
- Artificial Intelligence
- Systems Programming
- Machine Learning
- Database Management
- Operating Systems
- Computer Architecture

Experience

Indian Space Research Organisation (ISRO)

Jun 2025 – Jul 2025

AIML Intern

Sriharikota, India

- Developed a Syslog Anomaly Detection System using Isolation Forest, One-Class SVM, LOF, Autoencoders, and Elliptic Envelope.
- Performed log vectorization using TF-IDF techniques.
- Grouped similar log messages using SequenceMatcher for anomaly analysis.
- Designed a real-time GUI dashboard using Tkinter.
- Implemented IP monitoring and automated alert generation.

Team Centinels

Mar 2024 – May 2024

Software Developer

Chengalpattu, Tamil Nadu, India

- Worked as a Software Developer contributing to cybersecurity solutions in Network Thread Intelligence.
- Implemented and optimized core algorithms using C++ for performance-critical modules.
- Designed and developed efficient data processing logic for threat detection systems.
- Collaborated with the team to enhance system reliability and on-site deployment performance.
- Applied strong problem-solving skills in algorithms and system-level programming.

TechForce Academy (Salesforce Internship)

2025 – Present

Inventory Optimisation Intern

India

- Developed the StockSmart Inventory Optimisation Model for demand forecasting.
- Analyzed historical sales data to predict optimal stock levels.
- Generated replenishment recommendations based on demand trends.
- Designed inventory dashboards for stock monitoring and insights.
- Utilized Excel and Power BI for data modeling and visualization.

Infosys Springboard

Oct 2024 – Dec 2024

Machine Learning Intern

Virtual

- Developed predictive machine learning models for Market Mix Analysis using advanced regression techniques.
- Analyzed sales and marketing datasets to identify trends and insights.
- Performed data preprocessing, feature engineering, and model evaluation using Python.
- Created analytical visualizations using Matplotlib.

Projects

Robot Teacher Development | AI, ML, NLP, Robotics

Ongoing

- Designing and developing a physical robot aimed at enhancing classroom and self-learning experiences through intelligent automation.
- Integrating machine learning and natural language processing models to enable adaptive teaching based on student interaction and learning pace.
- Implementing real-time speech interaction, question answering, and feedback mechanisms for personalized learning assistance.
- Working on system architecture that combines embedded hardware, AI inference, and software modules for seamless human-robot interaction.

StockSmart – Inventory Optimisation Model | *Salesforce, Excel, Power BI, Data Analytics*

- Developed an inventory optimisation system to address stockouts and overstocking by forecasting future demand using historical sales data.
- Calculated optimal stock levels and replenishment recommendations by integrating lead times and sales velocity into predictive frameworks.
- Built inventory dashboards in Power BI to visualise stock issues, demand forecasts, and actionable insights for supply chain stakeholders.
- Leveraged Salesforce-linked analytics workflows to support data-driven operational optimisation.

Capsule Detection System | *Python, OpenCV, Machine Learning*

- Developed a computer vision-based system to classify biomedical capsules as positive or negative based on tip color detection.
- Implemented image preprocessing, color space analysis, and feature extraction techniques to improve classification accuracy.
- Trained and evaluated machine learning models to handle varying lighting conditions and image noise.
- Designed the system to support real-time image capture as well as gallery-based image input.

Share a Bite – Food Donation Platform | *React, Node.js, MongoDB*

- Built a full-stack web platform connecting food donors with NGOs to reduce food wastage.
- Implemented real-time food listing, request management, and donor-NGO coordination workflows.
- Integrated Google Maps API for location-based pickup and optimized routing.
- Developed secure authentication using JWT and role-based dashboards for donors, volunteers, and NGOs.

Certifications & Achievements

- Agentforce Specialist – Salesforce
- Networking Basics – Cisco Networking Academy
- Introduction to Modern AI – Cisco Networking Academy
- Deep Learning with MATLAB – MathWorks
- Oracle Certified Foundations Associate – Oracle
- NPTEL Certifications: Programming in Java (2024), Introduction to Database Management Systems (2025)
- Build With India Hackathon 2024 – Finalist
- ISRO Certification – Geospatial Analysis using Google Earth Engine
- HackerRank Certifications: Java (Basic), Problem Solving (Intermediate), Python (Basic), SQL (Basic, Advanced)

Technical Skills

Languages: Python, Java, C, C++, SQL

Developer Tools: VS Code, Eclipse, Google Cloud Platform, Android Studio

Technologies/Frameworks: Linux, Docker, Salesforce, GitHub, MongoDB, MySQL, JDBC, WebSockets, Flask, Tkinter

Languages Known: English, Tamil, Telugu, Hindi
